

0+00 N

Pole-Dipole Array

DRAFT

Instruments: Iris 4.0 Kw Tx, Iris IP6 Rx.
Frequency: 0.125 Hz.
Operators: P.E.W., J.W.

Logarithmic
Contours 1.5, 2, 3, 5, 7.5, 10, ...

INTERPRETATION

- Well defined, strong increase in polarization with or without marked decrease in resistivity.
- Fairly well defined moderate increase in polarization.
- Fairly well defined weak increase in polarization.
- Resistivity feature.

Scale 1:4800
